Profile

Over the years, I’ve taken ideas from simple concepts to functional products that users find genuinely useful in their day to day lives.

Employment History

Software Engineer at Ajared Inc.

Mar 2025 – Present

- Built a web application (Retail Intelligence) to collect store data for real-time analytics and map displays.
- Created a role-based access control system to manage user permissions and secure data.
- Developed an admin dashboard to manage users and monitor data quality, improving operational efficiency.

Software Engineer at PrudentBird Services

June 2025 – Present

- Built an AI chat application (Fuselon) integrating models from multiple labs.
- Implemented resumable message streams and error handling for reliability.

Backend Developer at Evoolv

June 2025 – August 2025

- Collaborated with a team of engineers to deliver features and improvements.
- Helped develop and maintain backend services with a microservices architecture.
- Worked on Elasticsearch and WebSockets to enable real-time data updates and efficient indexing.

Backend Developer at ReavDev

September 2024 – February 2025

- Developed ReavPages, an AI-powered tool for creating web pages.
- Built and maintained ReavLinks, a URL shortener and QR code generator.
- Delivered secure and user-friendly applications for internal and public use.

Full Stack Developer at HNG Tech

July 2024 – August 2024

- Top contributor on the HNG Boilerplate, Telex, and Lumbo projects.
- Implemented real-time search functionality in Telex using WebSockets.
- Built a reusable role based auth system for HNG Boilerplate and Lumbo.

Full Stack Developer at Emperor Guild Tech

December 2023 – August 2024

- Designed and built the landing page for Logos Royal Academy.
- Developed a system to manage student records and semester results.
- Created an AI-powered chat to assist students with studies and homework.

Frontend Developer at ZenDevz

March 2022 – June 2023

- Designed and built the landing page for ZenDevz.
- Developed multiple web applications on a contract basis for clients in various industries, from e-commerce to marketing.

Frontend Developer at Vengerry Community

July 2020 – May 2022

- Designed and developed multiple marketing pages for events.
